EMPATHY MAP

Empathy map on gas leakage monitoring and alerting system(oxygen level measuring)

```
                    ( 2)Scans the
                      level of gas )
  ( 3) Alert                              ( 1)Reads the
    when gas                                  gas )
    level is
    reduced )

                                                    ( 1)Stores the
                                                      generated
                    [ SMALL GAS                        report )
                      APPLICATION ]
  ( 4)Autofills
    when
    resources are        [ KIND OF              [ COMMUNICATION
    in buffer )            APPLICATION ]          GADGET ]

                                                    ( 2)Cautions
                                                      through
                                                      voice or text
                                                      messages )
  ( 5)V-Iot        [ LARGE GAS
    reduces cost     APPLICATION ]
    and autofills
    when
    resources are        ( 3)G-Iot         ( 1)Install G-iot
    in buffer )            alerts when        to big
                           gas level          cylinders )
    ( 4)V-Iot              reduced )
      alerts                     ( 2)Installs V-
      when                         iot to gas
      conditions                   pipes )
      are odd )
```
